

Fig.1

Fig. 2 is a cross-sectional view of a device 100 in accordance with the present invention. The device 100 includes a substrate 11, a layer 12, a layer 13, a layer 14, and a layer 15. The substrate 11 is a thick, rectangular block with a hatched pattern. The layer 12 is a thin, horizontal layer on top of the substrate 11. The layer 13 is a thin, horizontal layer on top of the layer 12. The layer 14 is a thin, horizontal layer on top of the layer 13. The layer 15 is a thin, horizontal layer on top of the layer 14. The layers 12, 13, 14, and 15 are all thin and have a cross-hatched pattern. The device 100 is shown in a cross-sectional view, with the layers 12, 13, 14, and 15 stacked on top of each other and on top of the substrate 11. The layers 12, 13, 14, and 15 are all thin and have a cross-hatched pattern. The device 100 is shown in a cross-sectional view, with the layers 12, 13, 14, and 15 stacked on top of each other and on top of the substrate 11.

A large, dark, circular object, possibly a tire or a large wheel, is the central focus of the image. It is surrounded by a bright, circular glow, suggesting a light source or a reflection. The background is dark and textured, with some faint, horizontal lines visible near the top edge of the circle.
